SUMMARY

Fresh CSE graduate from AUST with research experience in computer vision, NLP, and deep learning and like problems where data, language, and vision meet. I've also built full stack applications in PHP, MySQL, so I'm comfortable moving between software development and machine learning work. On my own time, I built a self-made syllabus by analyzing what AI engineer job postings actually ask for, and I'm learning from scratch through it, reading books and building portfolio projects around it, so I can walk into a company ready for the role and not just familiar with the theory. Looking for an AI Engineer (Junior/Trainee) role where I can put this foundation to work, learn from experienced engineers, and grow into a career as an AI Engineer.

EDUCATION

Ahsanullah University of Science and Technology (AUST)

Dhaka, Bangladesh

B. Sc. in Computer Science and Engineering

July 2026

CGPA: 3.13 / 4.00

Coursework: Structured Programming, OOP, Data Structures, Algorithms, Database, Intro. to AI, Pattern Recognition & Machine Learning, Soft Computing, Digital Image Processing, Mathematics I-IV, Software Development I-IV

TECHNICAL SKILLS

- **Languages:** Python (Pandas, NumPy, Matplotlib, PyTorch), C/C++, Java
- **AI/ML:** CNNs, RNNs/BiLSTM, Computer Vision, Transformers, NLP, LLM
- **SQL:** MySQL, PostgreSQL, Microsoft SQL Server
- **Web Dev:** HTML, CSS, Bootstrap, TailwindCSS, ReactJS, JavaScript
- **Dashboards:** Power BI, Microsoft Excel, Google Sheets, Retool
- **Tools:** Git and GitHub, Jupyter Notebook, Google Colab, Kaggle, VS Code, MATLAB
- **Interests:** End-to-end AI development (dataset preparation, model development & deployment), AI at Scale, and Real-world application, Object-oriented software development

UNDERGRADUATE THESIS

BanglaGuard: A Multimodal Deep Learning Framework for Audio-Visual Detection of Inappropriate Content in Bangla Children's Cartoon Videos

Defended June 2026

Poster Presented June 2026

Supervisor: Prof. Dr. Md. Shahriar Mahbub

- Achieves **87.02% accuracy** on a purpose-built 871-clip dataset.

ACADEMIC PROJECTS

Digital Preservation of Culinary Heritage: A System for Classifying

Feb 2025 – Jul 2025

Bangladeshi Desserts and Generating Traditional Recipes | *Soft Computing Lab Term Assignment*

- Built a multimodal deep learning system using EfficientNet-B0 and GPT-2 on a curated dataset of 4,118 images and 81 traditional recipes to digitally preserve Bangladeshi culinary heritage.

BechaKena.com – Full-Stack E-Commerce & Auction Platform | *Software Dev IV* | Demo *Aug 2024 – Nov 2024*

- Developed a PHP/MySQL web application with 8+ normalized tables and 20+ complex SQL queries handling real-time bidding, transactions, user management and dashboard with zero data loss.

Railway Ticket Management System – Desktop Application | *Software Dev II*

2023

- Built a Java Swing/MySQL multi-user ticket booking system with SQL queries and stored procedures for inventory management, booking records, and data integrity validation.

CORE COMPETENCIES

- Mathematics, Probability & Statistics • Problem-Solving • Object-Oriented Dev. • Quality Assurance
- Attention to Detail • Adaptability • Reliability • English Communication
