SUMMARY

Fresh Computer Science and Engineering graduate from *AUST*. I like problems where language, vision, and data come together, and that's what pulled me toward AI and machine learning. My background includes deep learning research, full website builds, and a lot of work with SQL and data. Currently mastering deep learning with PyTorch, Keras, and TensorFlow, following a plan I made myself to get ready for an AI Engineer job. I'm looking for a *Data or AI Engineer* (Junior/Trainee) role where I can use what I've learned, work with experienced engineers, and keep growing from there.

EDUCATION

Ahsanullah University of Science and Technology (AUST)

Dhaka, Bangladesh

B.Sc. in Computer Science and Engineering | CGPA: 3.13 / 4.00

July 2026

Relevant coursework: Data Structures, Algorithms, OOP, Database Systems, Intro. to AI, Pattern Recognition & ML, Soft Computing, Data Mining, Digital Image Processing, Software Development I–IV, Mathematics I–IV

Mymensingh Government College

Mymensingh Board

Higher Secondary Certificate (HSC) | Science | GPA: 5.00 / 5.00

2020

TECHNICAL SKILLS

- **Languages:** Python, C/C++, Java, JavaScript
- **Libraries & Frameworks:** NumPy, Pandas, Matplotlib, Scikit-learn, PyTorch, Hugging Face
- **AI & Machine Learning:** CNNs, RNNs/BiLSTM, Computer Vision, NLP, Transformers
- **Databases & SQL:** PostgreSQL, MySQL, Microsoft SQL Server — Joins, Subqueries & CTEs, Window Functions, Indexing, Triggers, Transactions, NULL Handling, Soft Deletion, Schema Design
- **Web Development:** HTML, CSS, Bootstrap, TailwindCSS, ReactJS, PHP
- **Dashboards & BI:** Power BI, Retool, Microsoft Excel
- **Tools:** Git & GitHub, Jupyter Notebook, Google Colab, Kaggle, VS Code, MATLAB

UNDERGRADUATE THESIS

BanglaGuard: A Multimodal Deep Learning Framework for Audio-Visual Detection of Inappropriate Content in Bangla Children's Cartoon Videos

Defended June 2026

Supervisor: Prof. Dr. Md. Shahriar Mahbub

Poster Presented June 2026

- Built a multimodal pipeline combining EfficientNet-based CNNs for visual features, a spectrogram-based CNN for Bangla audio classification, and a BiLSTM for temporal modeling.
- Achieved 87.02% accuracy on a purpose-built 871-clip dataset; under review for conference publication.

ACADEMIC PROJECTS

Digital Preservation of Culinary Heritage — Bangladeshi Dessert Classification & Recipe Generation | *Soft Computing Lab Term Assignment*

Feb 2025 – Jul 2025

- Built a multimodal deep learning system using EfficientNet-Bo and GPT-2 on a curated *dataset* of 4,118 images and 81 traditional recipes to digitally preserve Bangladeshi culinary heritage.

BechaKena.com — Full-Stack E-Commerce & Auction Platform

Aug 2024 – Nov 2024

Software Development IV Course Project | Demo delivered

- Designed the relational database schema in MySQL and wrote 20+ complex SQL queries (joins, subqueries, aggregation) to support real time bidding, transactions, and user management with zero data loss.
- Structured the platform into separate modules such as add to cart, user profile, and checkout, each handling its own logic independently, so the codebase stayed easy to extend, test, and debug as features grew.

Railway Ticket Management System — Desktop Application

2023

Software Development II Course Project

- Built a JavaFX/MySQL ticket booking system using SQL queries, Scene Builder, and Xampp.

CERTIFICATIONS

- *Associate AI Engineer for Data Scientists* — DataCamp
- *CS50's Introduction to Databases with SQL* — Harvard University

CORE COMPETENCIES

- Problem-Solving • Object-Oriented Development • Database Design • Mathematics, Probability & Statistics
- Adaptability • Quality Assurance • Attention to Detail • Reliability • Cross-Functional Collaboration
- Written and Verbal Communication
